CELEBRATE RETIREMENT... ENGAGE LIFE!

MEMO

TO: All IL/Duplex residents
FROM: Rod Mason, President/CEO
RE: A more direct reminder/notice
DATE: April 15, 2020

Hello folks... me again! This time I am going to be just a bit more direct about the information that I have shared with you previously. If it comes across offensive to you, I apologize... this is out of my very serious duty to advise, inform and protect you, all other residents and our staff. Somehow, the seriousness of this matter must get across to you! And for those of you who have been complying all along, thank you! For there have been many who have been doing the right thing!

You see, I have learned that, even since my memo of Monday in which I reminded you, again, that you should not be leaving your campus nor hosting any visitors, that indeed some of you have even gone out and been about since that note! You need to understand the impact of your actions that you are taking into your own hands.

IF you go out into the public (anywhere! Grocery shopping... picking up pharmacy... to Willshire for ice cream...) you are running the risk of being exposed to this nasty bug/virus! You might think that you can keep away from it (not sure why you would think that), but you cannot! IF that bug settles on you and infects you, ugly things can likely happen.

- You will get very sick
- You will expose anyone else that you come into contact with
 - o Other residents
 - o Your family
 - o Your spouse
- All will have to quarantine in place for at least 14 days!
- IF you get sick enough and have to be hospitalized, and if you do not die in the process, you will likely then need to be placed on our Westenfeld unit for recovery... NOT GOOD! YOU will have become the FIRST person to be infected on the South Campus
- IF THAT HAPPENS...
 - o Westenfeld will be closed down totally with no foot traffic through the halls, at all! Only staff assigned to that wing will have access
 - o ALL OTHER RESIDENTS will be confined to their units/apartments until the bug is cleared from the building.
 - o If you bring the virus into this building, unintentionally, of course, but because of your decision to not adhere to our requests, the virus will, more than likely, spread to other residents!

PLEASE DON'T BE THAT RESIDENT. Stay home please!
