RE: Update for September 25, 2020

DATE: September 25, 2020

Good morning! A brief update with very good news! Again, this week all tests from employees (280 of them) and nursing residents (107 of them) plus a few other residents have returned with **negative** results! We rejoice with that news and are pleased to report that we will be able to return to normal (well, pre-lockdown normal) activities as of 6:00 a.m. on Sunday to include communal dining, activities on this campus, and North Campus residents once again free to come inside (just not yet in Healthcare nor individual apartments to visit). Indoor/outdoor visitation for Nursing residents will commence Monday morning (you may begin to sign up again for those visits). There are currently no new active cases of the virus amongst residents nor employees! Thank you for your attention to our lockdown efforts. As a reminder for today and tomorrow yet, please do NOT be outside your apartment except for exercise in the hallways or outside. Do not congregate and visit with one another and please do not lounge in any lounges. We have just these final two days... bear with us and thank you again! Residents may tune in to Channel 88 this morning at 11:00 as I will be bringing important additional details of this and other pertinent information.
