CELEBRATE RETIREMENT... ENGAGE LIFE!

MEMO

TO: All Residents, Responsible Parties and Employees  
FROM: Rod Mason, President/CEO  
RE: Weekly Update, Back on Track  
DATE: March 12, 2021

Greetings! It was December 28 when we had the last positive test reported from a resident of our licensed area, and January 14 when we had our last positive employee! That seems so very long ago, but that is how long it has been since we have been breathing a bit easier and making plans for loosening our grip on restrictions! Unbelievable, you say? After the preceding two months? This past Monday, we performed tests on over 270 individuals (262 employees and the rest resident volunteers and Essential Family Caregivers) and all tests, once again, have returned negative! We have **no new resident/employee positive results** to report! Thank you, God our Father!

You have seen that we are widening the opportunity for visiting inside the buildings, now to also include visits inside the Nursing Facility and even inside private rooms! There are many rules that must be followed at all times for such visits to occur, and they are posted (along with the associated visiting hours) for your review on our website under the COVID-19 Information Link, or by going directly to <https://www.swissvillage.org/healthcare-resident-visitation/> for a quick review. You simply must abide by the rules associated with these visits or be faced with the prospect of being asked to exit at once with future visits likely to be restricted. Please, we indulge you, abide by the simple rules.

As a reminder, there are different hours of visitation and rules for the Nursing Facility versus the rest of the campus. This is for good reason, and we ask you to familiarize yourselves with those differences. The hours are posted on each entry door (Main entrance for non-Healthcare visits and Nursing entrance (EP Door) for Healthcare). No matter where you are visiting, you will need to check in at the appropriate entrance, be screened for signs/symptoms/COVID contact and have your temperature taken. Specifically for the Healthcare Facility visits, we ask you to limit your time according to the schedule that you signed up for and please be respectful of that time due to the fact that others are entering the building for the hours after your assigned slot. Healthcare visits must be reserved in advance of making the visit. For the rest of the campus you do not need to reserve visitation slots, but you do need to check in. Again, no more than two individuals at a time visiting with a resident in a private room or in an apartment. For Healthcare, residents who share a room, or residents who have a visit with more than two visitors, must do so in one of the assigned lounges for that purpose. Please sign up accordingly.

As always, thank you for your continued and ongoing prayerful support of the ministry of Swiss Village! Your prayers have certainly aided in the way in which we were able to persevere during the darkest of our moments! We treasure the ongoing support accordingly! And please, do sign up and take the vaccine at your earliest possible moment! Our residents (over 94% of whom have already done so!) are counting on you! We are getting through this **together!**
